

Marine Genetic Resources and the Nagoya Protocol

Preparing the Marine Scientific Community

SIDE EVENT WITHIN THE FRAMEWORK OF ICNP-3

Date: Thursday 27th February 2014
Time: 13:15 - 14:45
Venue: Asia and the Pacific / Contact Group Room,
2nd Floor, (Meadow Room)

“Its enormous biological diversity makes the marine environment a vast and unique reservoir of undiscovered genetic information and biochemical material.”

The EU 7th Framework Programme (FP7) is funding two international collaborative marine biodiscovery projects: PharmaSea and Micro B3.

With the support of the European Commission, project partners eCOAST, IUCN and Université catholique de Louvain will present some initiatives of the two projects that contribute to the good implementation of the Nagoya Protocol within European marine biodiscovery and biotechnology R&D.
